

## SSF67PM12 SERIES

### DUAL SWITCH POINT STAINLESS WITH M12 CONNECTION

The SSF67 has been designed to give the user a long reach float switch with a number of switching options, to cater for a wide variety of system requirements. Manufactured in Stainless Steel 316L material, these switches are suitable for use in many aggressive liquids or hygienic applications.

These are now available with industry standard M12 round 4 pin IP67 connectors.

The single float version gives high (make on rise) and low (make on fall) level indications for alarms and controls systems.

The dual float versions give either make on rise for both high and low levels (used for tank emptying control) or make on fall for both high and low levels (used for tank filling control).

The switches are screw mounted vertically via M16x2 thread, so require access to the inside of the tank.

#### Features

- Stainless Steel 316L material
- Single or dual switching levels
- M12 4 pin IP67 connection for quick connection to circuit
- Process temperatures up to 135°C
